

Download Apic Infection Control Guidelines

Guideline for environmental infection control in healthcare facilities is a compilation of recommendations for the prevention and control of infectious diseases that are associated with healthcare environments. Guideline for hand hygiene in healthcare settings provides healthcare personnel with a review...The infection preventionist (IP) has an important role in SSI prevention beyond SSI surveillance. To support IPs in this role, APIC has developed Infection Preventionist's Guide to the OR, which covers critical and evidence-based strategies to equip the IP in working collaboratively with multi-disciplinary teams to prevent SSIs. The Association for Professionals in Infection Control and Epidemiology (APIC) has launched an effort to educate industry partners in infection prevention and control (IPC) and held a recent training in partnership with BD (Becton, Dickinson and Company), an APIC Strategic Partner, at its facility in Vernon Hills, Ill., on October 1 and 2. The Practice Guidance Committee is charged with compiling, assessing, developing and influencing guidelines and standards related to the practice of infection prevention and control. This committee provides a means within APIC to guide and inform the membership on practice issues and recommends official positions on standards, guidelines and other pertinent documents affecting the practice of infection prevention and control.
