

Download Infrastructure Of Americas Bridges

Americas Infrastructure

Falling apart: America's neglected infrastructure. Our roads and bridges are crumbling, our airports are out of date and the vast majority of our seaports are in danger of becoming obsolete. All the result of decades of neglect. None of this is really in dispute. Business leaders, labor unions, governors, mayors,...Investments in bridges were bolstered in 2009 and 2010 with the influx of additional funding from the American Recovery and Reinvestment Act and peaked in 2010 with \$18 billion spent. Despite the recent increases in spending, investments in the country's bridges are insufficient. America's deteriorating infrastructure has been an ongoing concern for many years. The May 2013 collapse of a bridge in Washington was the latest event to peak the interests of the public and policymakers about the state, safety and financing of bridges and roads in the U.S. Invest in America Act. The Invest in America Coalition is a diverse, bipartisan alliance of real estate companies, investors, trade associations, and labor organizations. Their goal is to champion reforms that will attract more global investors to invest in American infrastructure projects.
