

Download The Data Journalism Handbook Lucy Chambers

The Data Journalism Handbook: How Journalists Can Use Data to Improve the News [Jonathan Gray, Lucy Chambers, Liliana Bounegru] on Amazon.com. *FREE* shipping on qualifying offers. When you combine the sheer scale and range of digital information now available with a journalist's nose for news and her ability to tell a compelling story Lucy thought she was going to be a journalist and instead, ended up teaching journalists how and why to work with data at Open Knowledge. She was one of the editors of the (first) Data Journalism Handbook. She later lead the successful School of Data programme which extended technical training to non-profit organisations across over 20 countries. The Data Journalism Handbook is a series of case studies and practices that have employed data to either create or complement existing news stories. Data journalism is a relatively new fork of the journalism field. This book is intended to be a useful resource for those with an interest in data journalism. Dr. Jonathan Gray is Lecturer in Critical Infrastructure Studies at the Department of Digital Humanities, King's College London, where he is currently writing a book on data worlds. He is also Co-founder of the Public Data Lab; and Research Associate at the Digital Methods Initiative (University of Amsterdam) and the médialab. Lucy Chambers
